Our simulators providing...

Certification for Professional Pilot Training

—— certification as FNPT II MCC

Certificable as FNPT II MCC, our simulators are optimized for your training organisation. By using original cockpit parts, our simulators offer an ideal environment for multi crew, basic jet and instrument trainings.

Sophisticated Motion platform

—— for a more realistic training

Our basic simulator starts as a fixed-based simulator. If you prefer a more realistic training environment, we will be happy to deliver your simulator with a sophisticated motion platform.

Multiple use cases

—— increasing flexibility and efficiency

With over 30 years of experience in event management with flight simulation, we may generate further revenues for your flight school by using the simulator as an event platform. You provide the ATO, we handle the events. Interested in a partnership? Contact us.

Full-Motion Event Simulator

— more than a
training device

Interested in Dry Lease?

We provide our simulators in Berlin and Hamburg for an incredible price-performance in a dry lease. Contact us for further information.

Mixed-Reality solutions

We are looking for partnerships in the upcoming market of eVTOL simulation. We developed a prototype called eVTOL Mixed-Reality Series X, which is already in use.

Are you prepared for eVTOL pilot training?

eVTOL pilots will acquire a new license called CPLV. We are prepared for this upcoming market, F.A.S.T.-Group has the training device.
